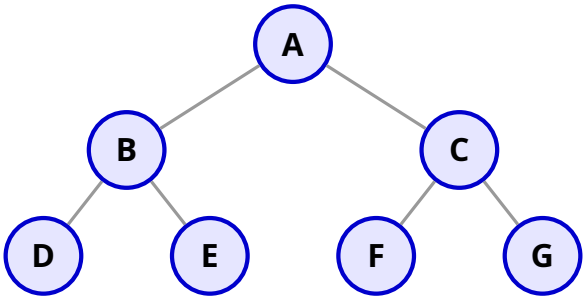
# Tree Traversal Practice

Data Structures

## Problem 1: Traversals of a Binary Tree

For each tree below, write the **inorder**, **preorder**, and **postorder** traversals.



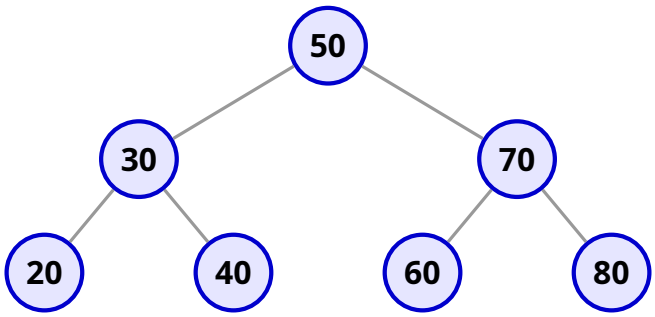
**Inorder:** _____

**Preorder:** _____

**Postorder:** _____

## Problem 2: Traversals of Another Binary Tree

For the tree below, write the **inorder**, **preorder**, and **postorder** traversals.



**Inorder:** _____

**Preorder:** _____

**Postorder:** _____

## Challenge Question

For one of the trees above, explain why the **inorder traversal** gives the nodes in sorted order when the tree satisfies the usual ordering property of a search structure.
